

Facility Network — Receiving & Ships-To Specification

Reference map of the four facility types (LPC, Gateway, Sub-gateway, Hub) across the Cairo, Giza and Alexandria zones — covering inbound receiving, outbound destinations, each node's role in the network, and current validation status.

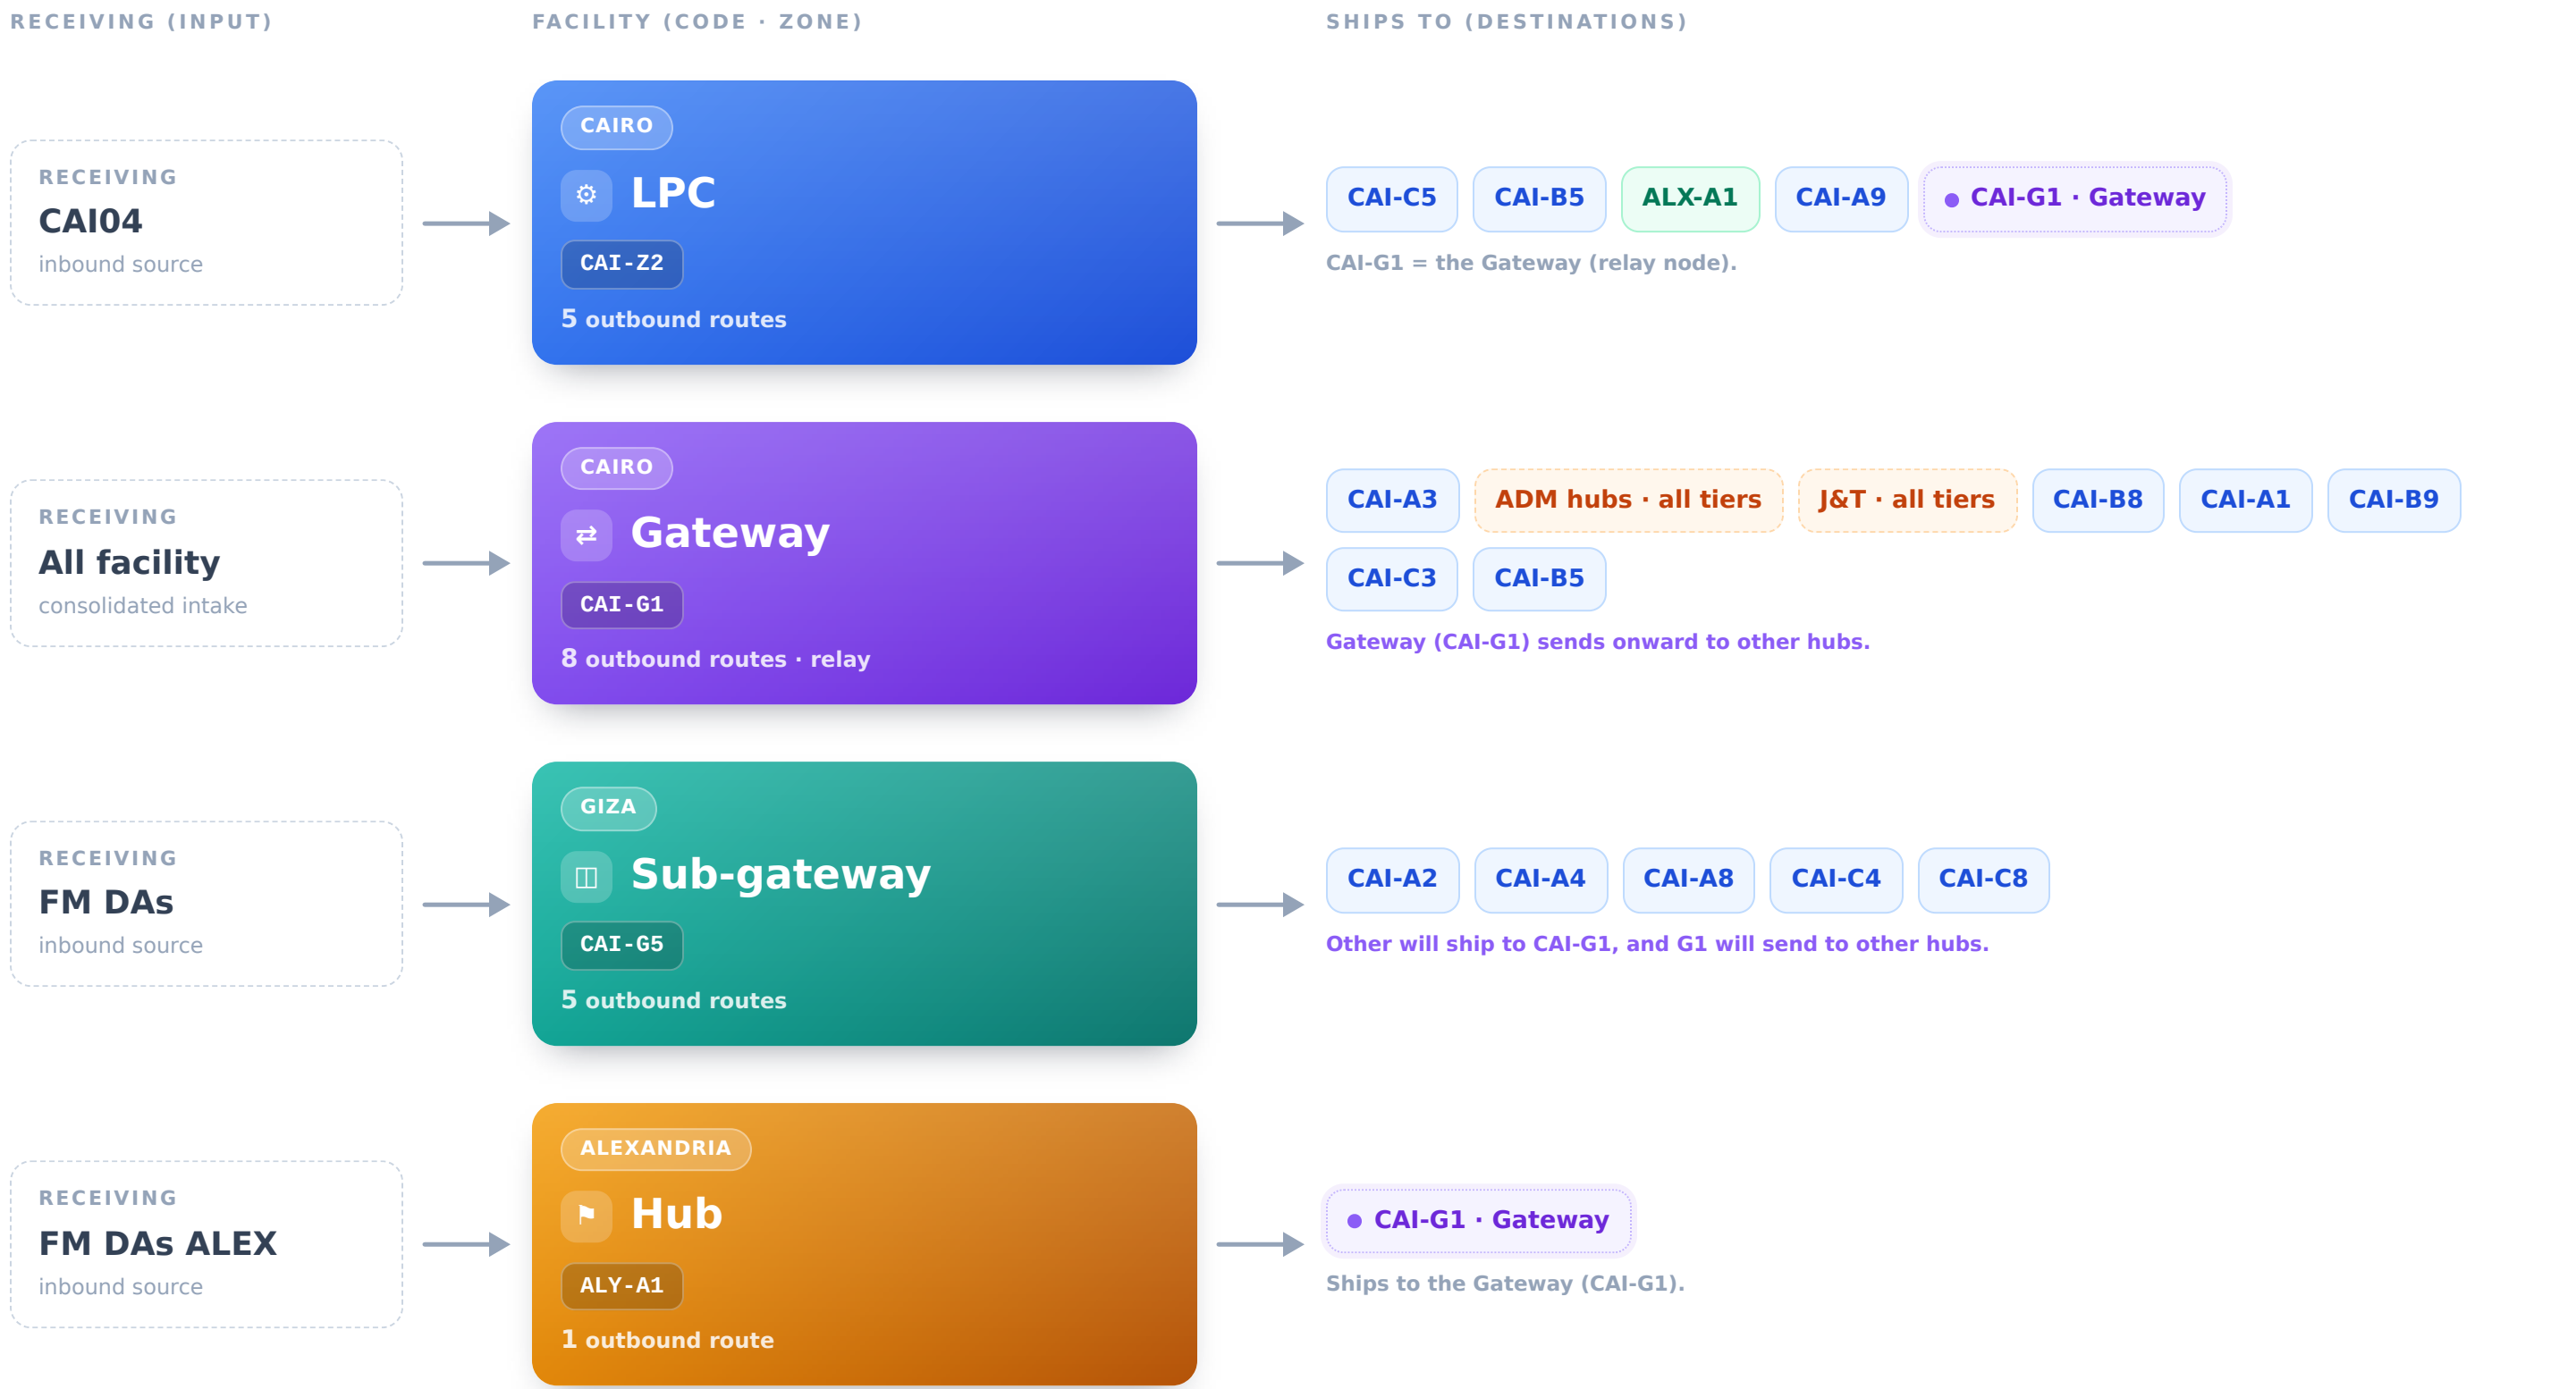

DOCUMENT	VERSION	PREPARED	FACILITIES	ZONES	OVERALL STATUS
Facility Network Spec	v1.0	1 Oct 2026	4	3	All Confirmed

1 Overview

The network is built from **four facility types** that receive inbound volume and dispatch it onward. Each node is identified by a **facility code** (city prefix + area, e.g. **CAI-G1**, **ALY-A1**) and sits in one of three zones. The **Gateway (CAI-G1)** acts as the central relay: several facilities ship **to** CAI-G1, and CAI-G1 then sends onward to other hubs. Every facility below is currently marked **Confirmed**.

CAI-Z2 LPC · Cairo 5 outbound routes	CAI-G1 Gateway · Cairo 8 outbound routes · relay	CAI-G5 Sub-gateway · Giza 5 outbound routes	ALY-A1 Hub · Alexandria 1 outbound route	100% Confirmed 4 / 4 facilities

3 Detailed Specification all fields from the network sheet

Facility Code	Facility Name	Type	Zone	Receiving	Ships To	Role in Network	Status	Notes	# Lines
CAI-Z2	—	LPC	Cairo	CAI04	CAI-C5 CAI-B5 ALX-A1 CAI-A9 CAI-G1	LPC in New Network (CAI04).	Confirmed	INFO Ships to Gateway (CAI-G1) plus 4 Cairo/Alexandria points.	5
CAI-G1	—	Gateway	Cairo	All facility	CAI-A3 ADM hubs (all tiers) J&T (all tiers) CAI-B8 CAI-A1 CAI-B9 CAI-C3 CAI-B5	Consolidation & relay: receives from all facilities, dispatches to ADM/J&T hubs and Cairo points; sends onward to other hubs.	Confirmed	INFO Also receives OPC5 (CAI-3 / CAI09); confirms unchanged.	8
CAI-G5	—	Sub-gateway	Giza	FM DAs	CAI-A2 CAI-A4 CAI-A8 CAI-C4 CAI-C8	Receiving from FM DAs, dispatching to Cairo points (CAI-A2/A4/A8/C4/C8).	Confirmed	INFO Receiving from FM DAs: CAI-A2, CAI-A4, CAI-A8, CAI-C4, CAI-C8.	0
ALY-A1	—	Hub	Alexandria	FM DAs ALEX	CAI-G1	Receiving DS volume and dispatch to CAI-G1 (Gateway).	Confirmed	OPEN Facility type to confirm.	0

4 Legend & Open Items

Legend / Key - Cairo facility (CAI-*) - Alexandria facility (ALX-/ALY-*) - Carrier / hub partner (ADM, J&T) - Gateway / relay node — CAI-G1	⚠ Open / To-confirm Hub (ALY-A1): facility type flagged as <i>to confirm</i>. Gateway (CAI-G1): also receives OPC5 (CAI-3 / CAI09) — confirm scope. ALX-A1 vs ALY-A1: LPC ships to ALX-A1; the Hub is coded ALY-A1 — confirm if same site. # Lines: auto field shows 8 (Gateway), 0 (Sub-gateway, Hub) — verify counts.
